As a Stanford-trained, board-certified cosmetic surgeon and a former Miss USA contestant, Dr. McCormack combines her paramount training and keen eye for beauty to not only work on her patients, but with them to tailor each procedure into a one-of-a-kind, individualized experience. Dr. McCormack explains, "We do our very best to achieve a natural result, and follow through from the beginning to ensure you are happy with the end result." And with a strong focus on educating the patient on options available, Dr. McCormack's goal is to inform her patients to achieve a result that fits.

With an all-inclusive office complete with a medi-spa, synergistic product lines and a highly attentive and caring staff, Dr. McCormack covers a wide spectrum in terms of procedures and services. One of her most popular procedures is her "Mommy Makeover," which includes combinations of breast surgery, body contouring and abdominoplasty. She also works with massive weight-loss patients to contour problem areas that may not snap back into place. "My comprehensive approach doesn't just cover surgery. It begins the minute a new patient walks through the door. I am always available for my patients, and like to work from the outside in to make sure a natural result is achieved. I spend a great deal of time educating patients about their procedure to ensure a satisfying experience, from start to beautiful finish."

"To be the best you can be, that sometimes entails changing a small part of yourself to boost confidence and live a happier life."

—TIFFANY McCORMACK, MD

BEAUTY BY DESIGN

As a full-service office, McCormack Plastic Surgery goes above and beyond to make sure full comprehensive treatment is available to each and every patient. With a focus on skin care and **UV PROTECTION**, Dr. McCormack offers the crème de la crème of personally tested skin-care products to keep patients **GLOWING AND HEALTHY** long after their procedures. The Medical Spa offers the full scope of rejuvenation services to help patients maintain a healthy and youthful appearance. With treatments ranging from facials, to lash tinting, to chemical peels, to Botox®, the nonsurgical rejuvenation treatments are among the most popular options offered. As a state-of-the-art facility, McCormack Plastic Surgery offers the **PORTRAIT 3D SURGICAL SIMULATION SYSTEM**, which allows Dr. McCormack to showcase the likely outcome of a breast augmentation surgery, giving patients a visual image of what they can expect to look like after the procedure takes place. The simulated results can be viewed from all angles, and specific sizes of **BREAST IMPLANTS** can be input into the computer so the patient can see results in a number of different scenarios.
